

Watermelon Jalapeno Margarita

I thought I'd give you a little different recipe this week. Summer time is filled with cocktails. Watching the Yankees play with a summer time cocktail in hand is a great way to spend an afternoon. Clients always ask "if I were to drink, what kinds of drinks should I have?" Well, stay away from sugary mixed drinks and beer instead have a liquor such a vodka, tequila, gin or champagne with club soda or fresh fruit puree and a squeeze of lime or have this watermelon margarita. It's very refreshing!! Enjoy!

xoxo,
Kristin

Directions:

1. Blend watermelon in a high speed blender then strain through a mesh strainer into a glass pitcher.
2. Then blend together the lime juice, agave and jalapeños and strain once again through a mesh strainer.
3. Pour lime mixture into the glass pitcher with the watermelon juice then add tequila and mix to combined.
4. Serve over ice and garnish with fresh lime and jalapeño!
